STRIKE FOR SECOND TIME

Two Men Who Were Reinstated Give Up Positions.

INJUNCTION IS GRANTED

Camp Manufacturing Company Restrained from Running Railroad Through Land of Harris Until Further Order of Court.

(Special to The Times-Dispatch.)

PETERSBURG, VA., July 25.—It is rather hard at present to know how long the returning striking motormen and conductors will require to make up definitely their minds. "Now they work and now they don't work," Henry Daniel and E. B. Johnson, two of the thirty-five men who returned, gave up their positions voluntarily this morning, saying they did not wish to hold their jobs any longer. E. R. Tindall and R. B. Parsons, conductors, who made application yesterday for reinstatement, withdrew their applications. The strikers say that the return of so many men a few days ago was due to a misunderstanding in the union. They expect many others to return to the union.

Superintendent Harrell said today that he did not know exactly why the men left, unless it was because they were not given the runs they had before the strike.

There are now twenty old men in the employ of the company, and ten applications on file. There were fifty-two who went out on the strike.

JUDGE MULLIN, of the Corporation Court, rendered his decision in favor of the plaintiffs in the case of Harris and wife against the Camp Manufacturing Company, which was removed from Sussex County to Petersburg at the request of Judge Hancock. Judge Mullen granted the injunction asked for by the plaintiffs, restraining the defendant company from using plaintiffs' land, especially for running the railroad through the property, until further order of the court.

Mr. Henry Butler represented the plaintiffs, and Messrs. R. B. Davis, Robert Turnbull and John C. Parker represented the company.

The First Baptist Church to-morrow will look into the matter of extending a call to a pastor to succeed Dr. Battle. The names of many now before the committee in charge have not been made public.

An engineer and head of the mechanical department will be appointed by the special board of directors of the Central State Hospital at their meeting next month to fill the vacancy caused by the resignation of Mr. Slocum, who for several years has been the very efficient chief engineer. Any member of the board or the superintendent of the hospital will be glad to give to any one information regarding the position.

The West End Baptist Church expects to carry about eight hundred persons to Virginia Beach next Thursday on their excursion. Mr. W. M. Rucker is in charge of the excursion.

MASS FOR THE POPE.

At St. Joseph's Catholic Church Monday morning at 8 o'clock a requiem high mass will be celebrated by Rev. Father O'Ferrall for Pope Leo. This morning the bell of St. Joseph's Church was tolled between the hours of 9 and 10, this time corresponding with the hour of the Pope's funeral, 3 P. M.

The residence of Mr. G. R. Roettger, a short distance from the city in Chesterfield county, had a narrow escape from destruction by fire yesterday. The fire was caused by the overflowing of an oil stove, the oil taking fire and igniting the kitchen, which is detached from the main dwelling. The only damage done was to the kitchen.

Mr. W. E. Poole and family have returned after a pleasant stay at the seashore.

Mrs. Ida D'Alton and family will leave Monday for Wytheville to spend the summer.

Mr. Barkdale Lathrop, of Richmond, is visiting Mr. Samuel Zimmer, on Synamore Street.

DANVILLE'S CITY ENGINEER DEAD

(Special to The Times-Dispatch.)

DANVILLE, VA., July 25.—Capt. C. A. Ballou, the veteran City Engineer, died at Rockbridge Alum Springs this morning. He had been in ill health for several years. He had been City Engineer since 1874, and nearly all of the modern improvements in the city were planned and carried out by him. The splendid reservoir, with a capacity of 50,000,000 gallons, is one of the features of his administration of this department of the city government.

Captain Ballou was reared in Halifax county, where he went to school on his father's plantation, completing his education at Washington College, now Washington and Lee University. He was in the quartermaster's department during the civil war, under Captain Harry Robinson, in command of Major Charles A. Carrington.

He came to this city with an engineering corps in 1870 to lay off the route of the Danville and Great Western Railway,

which road was never built. He settled here, and four years later was appointed to his present position. He was a most efficient public servant.

Captain Ballou was married three times. His first wife was a Kentucky lady. He had two children by her, both of whom—Mrs. Whaling, of Roanoke, and Mrs. John Herndon, Jr., of Baltimore, Md.—are living. His second wife was the eldest daughter of the late Nathaniel Talley, the first cashier of the Planters' National, now the First National Bank of this city. This lady was the mother of Mrs. Natalie Ballou, of this city; C. C. Ballou, Jr., of the "Baltimore American"; the Rev. J. Eustice Ballou, of Croftsville, and Talley Ballou, of the United States navy, all of whom survive. Captain Ballou had no children by his last wife. Captain Ballou was 69 years of age. He was pronounced a consumptive in early life and the prediction made that he would not live many years. His long life was possibly due to his great will power. It may be said that he was determined not to die before reaching an advanced age. The body will arrive in this city to-morrow morning. The entire city is in mourning.

A special meeting of the City Council was held this afternoon at 5 o'clock, at which resolutions on the death of Captain Ballou were read and unanimously adopted.

A WARSHIP FOR TURKS

Cruiser for Sultan's Navy Launched at Philadelphia.

ANOTHER MONSTER BOAT

A Leviathan Launched for Pacific Mail Service at the Camden, New Jersey, Yards—Dimensions of the Gigantic New Steamer.

(By Associated Press.)

PHILADELPHIA, PA., July 25.—In the presence of a distinguished gathering of diplomats, foreign and American naval officers and prominent citizens of Philadelphia, the Turkish cruiser Medjidiah, the first warship ever built here for the Ottoman Empire, was launched to-day at Cramp's shipyard. The sponsor for the new addition to the Sultan's navy was Mrs. Edwin S. Cramp, and the baptism was an evocation of the Koran's teaching, turned into a graceful compliment to the American people. The Koran forbids a Turkish woman from participating in a christening at which wine is used. The difficulty was overcome by the selection of an American woman, Mrs. Cramp, to break the bottle on the bow of the sea-fighter.

The general dimensions of the vessel are as follows: Length on load line, 330 feet; beam, extreme, 42 feet; draft, mean, 16 feet; displacement, 3,300 tons; speed, 22 knots.

The Mammoth Mongolia.

(By Associated Press.)

CAMDEN, N. J., July 25.—The steamship Mongolia, built for the Pacific Mail Steamship Company, was launched to-day at the yard of the New York Shipbuilding Company. The Mongolia is the second largest ship ever built in the United States. She is to be used in the Philippine and China trade. Her sister ship, the Manchuria, will be launched in October.

Miss Lucy Bell Kennedy, of Pittsburg, christened the Mongolia.

The Mongolia was originally intended for the Atlantic Trade, but was purchased by the Pacific Mail Steamship Company.

The Mongolia is constructed wholly of steel.

RELIANCE WILL DEFEND THE CUP

(By Associated Press.)

NEWPORT, R. I., July 25.—The races for the selection of a ninety-footer to meet the Shamrock III, was brought to a close to-day. The contest, between the Atlantic and the Columbia, was decided by the old champion gybed around the second mark, but topmast was carried away close to the heel. Her tender, the Park City, took the disabled craft in tow and brought her to the moorings. The race all started when the flag was hoisted from the Columbia out of the race all interest in the contest was ended, as the Reliance won by six minutes eighteen seconds over the Constellation.

The Reliance also met with an accident, but not until after she had finished the race and was about to make her moorings outside of Goat Island. The big spout came caving into the harbor under main sail, club topmast and jib. Giving a wild sweep the Reliance gybed her mainmast over to port to run to the mooring buoy. As she did so a puff of wind heeled her down, and the steel mast buckled about ten feet from the jaws. The Reliance anchored immediately, and the mainmast was lowered and hauled from the broken spar.

No Breeze; No Race.

(By Associated Press.)

NEW YORK, July 25.—Shamrock III, had dropped her trial horse half a mile after six miles of racing off Sandy Hook yesterday when the fickle land breeze deserted them. The race was abandoned and the yacht towed up to Erie Basin.

Sir Thomas will visit West Point to-morrow as a guest of Adjutant-General H. C. Corbin.

Many See Hospital

This Admirable Institution Lavishly Praised by All.

OPEN TO VISITORS TO-DAY

Doubtless Many Hundreds Will Inspect the Memorial Building To-Day.

Battle Against Disease Begins To-Morrow.

Nothing can take the place of health. If there were such a thing it would be getting well in such a clean, cool, bright and wholesome place as the new Memorial Hospital.

This handsome structure, which took the place of dilapidated and old-time residences at the corner of Twelfth and Broad Streets, was yesterday at noon thrown open to the public, and that event signified its completion. It is a splendid work. It stirs the gratitude of the well and strong to know that such a place has been prepared for the sick. It is a great resting place, bright and home-like, of spotless purity and whiteness—a safe haven for the stranded in mind and body.

Representative Throng.

The doors of the hospital were opened shortly before noon yesterday. The hour of 12 M. had been set, but a number of persons had gathered at the entrance earlier, and the eminently respectable colored man stationed by the door turned an attentive ear to their entreaties and let them in. From that time until late in the afternoon there was an unbroken stream of visitors. It is a pity, possibly, that a register had not been provided, and those who thus expressed their interest in the hospital invited to register.

The names of yesterday's visitors and the hundreds who will go there to-day would be worth preserving in the archives of the institution, and be interesting to look over in coming years.

The throng was representative to the last degree. The hospital was not built for the wealthy, nor yet for the poor. The founder and the builders had no class in mind to allow their philanthropy. The conception of it included every one—rich and poor—and in the execution of the thought the first ideal was never lost. The first and almost the only question asked was "Is he sick?" Does he need medical attention?" His name and station are secondary incidents.

Massive Building.

Probably the first impression made upon the visitor is the immense size of the building itself. It is a huge and roomy structure. It is entirely complete, and its architecture is entirely satisfying. The rooms are large, bright and airy. There is not a gloomy corner in the building. Little "blue devils" could never live in so much brightness and cheer. The windows look out on the face everywhere, and breezes which have blown over the green lands of Chesterfield fan your cheek impudently at every turn.

The massiveness of everything is also realized. Loud and distracting sounds that split the head and make the nerves quiver could not be made there. The street cars pass unnoticed, or seemingly so far away in their hum that they drive away loneliness, rather than distract.

Clean and White.

Every nook and corner suggests and forces upon one the impression of cleanliness. The private rooms and wards are spotless and white. Only necessary furniture is used, and that of a character that is most easily kept dustless.

The furniture, too, is the best, well selected and well arranged. The beds are pure white, and so tempting to lie on as to make one hesitate between the clean and the dirty. The hospital authorities entrusted this important feature in the making of a great hospital to Messrs. Snyder and Hundley, proprietors of the mammoth furniture store on Broad Street, and excellently have they discharged their mission. Mr. Snyder has given his personal attention to the matter, and has been tireless. The unstinted praise of every one who has been inside of the building is the best tribute to be paid to his energy, business sagacity and judgment, for he had to be a buyer, as well as a seller.

The only inscription in the building is in the hall. It is the dedication of the institution, "Unto God." The building will be open from 9 o'clock until evening to-day, and every one is cordially invited to see and go. If it is not a hall to kitchen to-morrow the institution's dress parade, if the figure will be forgiven, will be over, and the real mission of its existence, to battle against disease and untimely death, will begin.

ANGLO-AMERICAN

Cordial Reception for O. R. Riflemen by the British.

(By Associated Press.)

BISLEY, ENG., July 25.—The great annual rifle meeting was finished to-day with bright weather, but a gusty wind quartered the range and precluded high scoring. The American team made a great send-off on leaving here for Liverpool this morning. Major-General Lord Chelmsford, chairman of the Council of the National Rifle Association, made the farewell speech, and Colonel Leslie C. Bruce, captain of the British team, replied, thanking Lord Chelmsford for the cordial reception accorded the Americans here. The train steamed out of the station with the bands playing "The Star Spangled Banner," followed by "Auld Lang Syne." All the inhabitants of the Canvey City turned out with brass bands to bid the Americans God-speed.

COLUMBIA AND SHAMROCK NOT LIKELY TO RACE

(By Associated Press.)

NEW YORK, July 25.—Commodore E. D. Morgan, manager of the yacht Columbia, said to an Associated Press representative this morning that he had made no agreement to race the Columbia against Shamrock. "Whether he would be willing to do so in case the matter was properly advanced he was unprepared to state. There is a strong belief here that such a race will not be arranged."
